Key & Remote Replacement

Twenty years ago car keys were a simple piece of metal that could be cut at any local hardware store for a couple of dollars, but not anymore...

Today, automotive manufacturers incorporate high tech computer chips and electronics into their keys to protect their vehicles from theft and provide convenience and safety features to their drivers.

Features like engine immobilizers, audible alarms, remote entry, automatic trunk pop, panic mode, power slider and/or rear doors, remote starters and more are all great but have dramatically increased the cost of a replacement key should one get lost, stolen or damaged. This is where the Janus Key & Remote Replacement Plan steps in.

-  Janus will pay the parts and labor costs of cutting a new master key
-  Janus will pay for the cost of any factory clicker/fob, including any factory or dealer installed remote starter
-  Janus will pay the cost of programming the key and the clicker/fob, which now often takes up to an hour or more of a technician's time.

Plus...

The Janus Key & Remote Replacement Plan includes FULL membership in a top notch motor club which provides the following benefits for the ENTIRE term of the contract:

-  24 hour emergency roadside assistance including jump starting your car if your battery dies; delivering gas, water or oil if your car runs out; changing a flat tire; providing a locksmith if you lock yourself out and much, more more
-  24 hour towing
-  Rental car discounts at thousands of locations throughout the US and Canada
-  Map routing service
